<b>Project Name</b>	<b>Travel Network System</b>
Roles	Web Developer
Environment	Angular,.Net Core Rest API, MS SQL Server, Azure Server , Docker, SignalR
Description	<p>Interaction Travel network is web base application which has been use by multiple resorts who can provide set of programs like fly back, walkway and maintenance fee. Their sales team can then sales the program to customers and get the commission on every sale. Following are the users and modules include on this project:</p> <ul style="list-style-type: none"> <li>• Dashboard</li> <li>• User Management</li> <li>• Role Management</li> <li>• Ticketing System</li> <li>• Resort management</li> <li>• Buy program</li> <li>• Deposited Program and evidence program</li> <li>• Approve /Disapprove Deposited and evidence</li> <li>• Reporting</li> </ul>
Duration	Feb 2022 To June 2023

<b>Project Name</b>	<b>Sales Quote Management System</b>
Roles	Web Developer
Environment	Angular, Asp.net MVC, MS SQL Server, RDLC Report
Description	<p>The Sales Quote Management System is a web-based enterprise application designed to streamline the process of creating, managing, and tracking sales quotations for a company's products or services. The system automates the quote generation process, ensuring accuracy, consistency, and faster turnaround times for the sales team.</p> <p>Key functionalities implemented in the system included:</p> <ul style="list-style-type: none"> <li>• <b>User Role Management</b> for Sales Reps, Managers, Customer and Admin.</li> <li>• <b>Dynamic Quote Creation</b> with customer and product selection, pricing rules, discounts, and tax calculations</li> <li>• <b>Version Control</b> for quote revisions</li> <li>• <b>Approval Workflows</b> with role-based validation</li> <li>• <b>Quote History Tracking</b> and audit logs</li> <li>• <b>RDLC-based PDF generation</b> for printable and downloadable quotes</li> <li>• <b>Dashboard &amp; Reporting Module</b> for sales performance insights</li> </ul> <p>This project significantly reduced manual errors, improved quote turnaround time, and provided management with valuable insights through real-time reporting.</p>
Duration	May 2023 to April 2021

<b>Project Name</b>	<b>Order Management System</b>
Roles	Web Developer
Environment	Angular, Asp.net Core Rest API, MS SQL Server , Azure Server
Description	Order management system is mainly used for driver and customer to manage their order and track their order.

	<p>Customer can assign Order to driver to delivery to their client. Customer and their end client can track the order status anytime from the system.</p> <p>Following are the main modules of the systems.</p> <ul style="list-style-type: none"> <li>• Customer Management</li> <li>• Driver management</li> <li>• Order Management</li> <li>• Invoice Management</li> <li>• Tracking Order Management</li> <li>• Reporting</li> <li>• Role Management</li> </ul>
Duration	May 2021 to June 2020

<b>Project Name</b>	<b>Web Based Data Privacy &amp; Organizational Security</b>
Roles	Web Developer
Environment	Angular, Asp.net Core Rest API, MS SQL Server, RDLC Report
Description	<p>The system is a web base, which Providing Security and Privacy Solutions to Businesses Around the World.</p> <p>Application provides an array of security solutions, from leadership and policy development to auditing, testing, and training to help make sure your data stays safe. Application knows the ever-changing landscape of privacy can be challenging to adapt to and provides privacy solutions to help address those challenges</p>
Duration	May 2020 to Feb 2018

<b>Project Name</b>	<b>Hotel Room Management System</b>
Roles	Web Developer
Environment	Angular, Asp.net MVC, MS SQL Server, Docker, Devepress
Description	<p>Application use for manage the Hotel room management system there are three type of user admin, housekeeping and guest. Admin can check the status of each room and there are certain workflow of the Mange room like</p> <p>From Dirty, Assignee to hose keeping, then working progress, Completed and Inspected and ready for vacant.</p> <p>There is spate guest view also where guest can make request or do DO not disrobe tag.</p>
Duration	Jan 2018 to April 2016

<b>Project Name</b>	<b>Online Portal for Restaurant</b>
Roles	Web Developer
Environment	Angular, Asp.net Core Rest API, MS SQL Server, Docker, Telerik
Description	<p>Website is manly used for online shopping restaurants products where User can access restaurants details and its products list by clicking on its address from Google map. There are mainly three modules. Shop: Purchase product, Plate and Invoice/Payment of shop product. Shop Admin: can create product, prize and CMS page for its shop and also buy product form supplier that is enter by users. Purchase from company. And also access Forum, Blog and its profile. Admin: Maintain all Shop and Supplier information.</p>
Duration	March 2016 to Jan 2015
