CAREER OBJECTIVE

To continuously learn, grow, work enthusiastically in team to achieve goals of organization with devotion and hard work.

SUMMARY

- Actively participated in testing of soil, aggregates, cement, and other construction materials to ensure quality compliance.
- Conducted site inspections and verification along with site engineers, ensuring adherence to contract specifications and project requirements.
- Supervised raw material inspection including cement, aggregate, and rebar, and monitored process inspection and calibration at RMC plants.
- Executed and supervised structural works, pile foundations, block work, self-leveling, screening, plastering, tiling, painting, and overall finishing works.
- Prepared bar bending schedules, structural shop drawings, cross-sections, design levels, plans, and layouts based on contract drawings and site conditions.
- Conducted measurements and documentation of all building and structural items, ensuring accuracy for billing and reporting.
- Managed all construction activities on site, including formwork, scaffolding, reinforcement, concrete pouring, masonry, plastering, tiling, painting, and finishing, maintaining high-quality standards.
- Monitored daily progress, site safety, and quality control, ensuring compliance with drawings, specifications, and DMCC regulations.
- Prepared daily and monthly progress reports, coordinated with subcontractors, and managed running & final bills as per contract conditions.
- Actively collaborated with architects, consultants, contractors, and MEP teams to integrate all works seamlessly.
- Implemented and ensured compliance with safety protocols, environmental standards, and quality assurance procedures on all sites.

- Developed strong skills in team management, independent work, problem-solving, and adopting modern construction technologies.
- Demonstrated expertise in coordination, quality assurance, material management, site supervision, and end-to-end project execution.
