## EXPERIENCES

### Hivelocity Inc. — Backend *Software Engineer* AUGUST 2024 - Present

- Maintained and enhanced websites for Japanese influencers, including platforms like Fancommerce, Café, Kuji, Reservation.
- Reduced technical debt by upgrading Laravel and PHP versions of industrial company websites in Japan.
- Designed and maintained the backend of a multi-tenant platform, providing RESTful APIs for E-commerce and Fan Commerce websites used by leading Japanese brands and influencer artists.

### UBA Solutions (A Monotype Partner Company) — CSM & Sr. Software

*Engineer* APRIL 2018 - AUGUST 2024 (6 Years 5 Months)

- Engineered and optimized ETL processes to streamline foundry and font data across enterprise and e-commerce platforms, resolving multi-platform data synchronization issues.
- Engage in the process of transitioning and moving millions of current users and orders from a legacy system to an enhanced system so that organization can focus on the one platform instead managing multiple platforms.
- Worked on the AWS migration of legacy e-commerce sites(Core PHP) from existing servers to AWS to save server costs around \$5000 monthly.
- Implemented correct security headers values for the sites, PHP version upgrade which made failed measures to pass in bitsight.
- Contributed to the Foundry management system(Backend Lumen) which manages top foundries of the world, quality delivery by writing code with more than 80% of unit test coverage.
- Coach dev team and product owner for efficient value delivery along with making self managed by conducting effective retrospective meetings as working as a Scrum Master for a team.

### Introcept Nepal — *Software Engineer* OCTOBER 2016 - MARCH 2018 ( 1 Year and 6 Months)

- Worked on building CRM (Laravel backend) for agents used by 400 education consultancies worldwide.
- Migrated frontend from jQuery to Vue.js without breaking existing working features.
- Initiated usage of module bundler(webpack), single page application, and state management (vuex).
- Employed prefabricated design patterns to shorten development times by applying existing frame-works.
