- **Deployment & Monitoring:** Splunk, Dynatrace, Bitbucket, SonarQube
- **Development Tools:** Angular, C#, .NET, SQL, JavaScript, Node JS ,React
- **Competencies:** Product Development, Client Interaction, Team Management

## WORK HISTORY

### SRM Technologies - Associate Team Lead

- Led a team in migrating legacy applications to a modern technology stack using Node.js and React, resulting in improved performance, scalability, and maintainability.
- Directed the implementation of Azure Active Directory (Azure AD) authentication across all applications to enhance security and streamline user access.
- Oversaw end-to-end deployment of applications in cloud environments, ensuring reliability and smooth release cycles.

### ADP India Private Limited - Associate

- Utilized Agile methodologies to design and develop payroll operations features, enhancing user interfaces with JavaScript and Angular, implementing monthly and yearly payroll calculations using C#, .NET, and REST APIs, and building efficient functionalities for viewing and downloading pay slips and reports using C#, SQL, and PostgreSQL.
- Led end-to-end product lifecycle management, from ideation to release, ensuring seamless execution in Agile environments.
- Analyzed and provided permanent solutions for critical production issues, ensuring timely and accurate resolutions.
