Mobile No: +918341732443

Professional Summary:

- Having 5.1 years of total experience in the IT industry.
- Having 4.4 years for Development Experience in
  .Net Technologies
- Having 3 years for .Net Technologies **C#. Net, ASP.Net MVC** and
  Web Api, Ado.net
- Having 2.5 years of Experience on . **ASP.Net core.**
- Having 6 months Experience on **ReactJS**
- Working with **JavaScript** and **jQuery**
- Working with **Web API** with **Ajax** Calls.
- Good working Knowledge on OOPS Concepts and its implementation using C#.Net.
- Having good experience in Database Programming-development of
  database objects like **Tables**, **Views**, **Stored Procedures** using
  Microsoft SQL Server.
- Worked with version control tool **Source Tree, Git**
- Good Analytical, Debugging & Problem-solving skills.
- Capable of quick learning and Expertise in working independently or as part of
  a team.

Work Experience

- I worked as **Software Developer** in **Wipro Limited**, Hyderabad from 26-
  July- 2021 to Oct-07-2025.

- I worked as **a Software Developer** in **Global Data**, Hyderabad from 27-Jan-
  2020to 10-May-2021

Technical Profile

Operating System	: Windows 11
Programming Languages	: C#.Net
Framework	: Asp.Net MVC Framework
Web Technologies	: Asp.Net MVC, Asp.Net Core MVC, Web API, React Js
Scripting Languages	: JavaScript, jQuery Ajax
Data base	: SQL Server 2012/2014
Version Control	: Source Tree, Git

Educational Profile
- Bachelor Of Technology from **JNTUH,** in 2016

Projects

#1 Microsoft App Compatibility – ACG-Maestro

Role   : Software Developer
Client   : Microsoft
Environment   : C#, Asp.net MVC, Web Api, .Net core, jQuery, Java script Bootstrap, HTML5, SQL Server, React Js

Description:

Led development and automation efforts for *ACG-Maestro*, a Microsoft internal toolset designed to streamline application compatibility testing across Windows builds and enterprise configurations. *ACG-Maestro* integrated cloud-based automation pipelines, and compatibility assessment for legacy and modern applications. Enabled proactive detection of regressions during Windows updates and improved onboarding velocity for enterprise apps via intelligent packaging, analysis, and orchestration workflows

Roles & Responsibilities:

- Involved design Coding in .Net Application using c#.Net, Asp.net MVC, .Net core, React Js
- Automated applications for Legacy applications
- Used Version Controlling Git

#2 Global Data

Role   : Software Developer
Client   : Global Data Research Center, Uk
Environment   : Asp.Net MVC, C#, jQuery, Bootstrap, T-SQL.

Description:
Fully integrate unique data, expert analysis and innovative solutions into one platform – giving you easy access to a complete and comparable view of the world largest industries.

Roles & Responsibilities:

- Design and developing the new functionalities based on client requirement.
- Involved in Design, coding in .NET Application using C#.
- Used Visual Studio.NET debugger and ASP.Net MVC trace functionality to debug the application.
- Used Version Controlling Tool Source Tree
